

GPS Asset Tracking - Fleet Management System

Products and Services

TOTAL SOLUTIONS PROVIDER FOR YOUR TRACKING NEEDS

Company Introduction

Covexis Pte Ltd specializes in today's GPS tracking systems. Founded in 2009, Covexis provides leading edge technologies and we are the one-stop solution for all your asset tracking and fleet management needs.

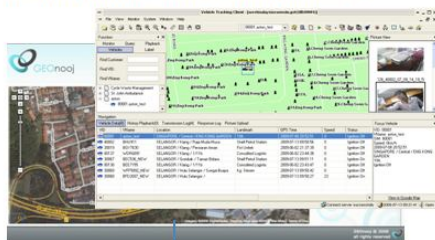

Covexis' advantage is the ability to provide the best of breed fleet management software and hardware for all your asset tracking and management needs.

Covexis' solutions has proven to help companies increase fleet efficiency, reduce operating costs, and thereby improving customer satisfaction. Our vehicle tracking capabilities provide not just only pinpoint accuracy for the location of your vehicle or assets while supplying rapid and updated vehicle information, including speed, location, direction, maintenance information such as fuel gauge, engine idling time, and many other useful vehicle activities such as harsh breaking, temperature monitoring for refrigerated cargo trucks.

We specialize in creating GPS tracking systems to provide our customers with endless capabilities to assist in the streamlining of your day-to-day operations and to take control of your mobile assets. We deliver reliable technology solutions that will meet your business objectives. Cost effectiveness and customer service are our top priorities.

What is Vehicle Tracking?

Web/Client based management system to monitor, manage and control all assets

Vehicle information and location will be transmitted over the air to control. Control will then interpret the information gathered and display it on screen

Satellite provides positioning information of Tracking Device

Tracking Device is installed into vehicle

Covexis Fleet Management Solution

Our solution is a multi-tiered approach, providing a robust, best of breed solution for either individual with single asset that they would want to track, or large corporations with a fleet of vehicles to manage.

Covexis' complete solution comprises of three modules –

1. Asset Tracking
2. Personnel Management
3. Fleet Management

Using Covexis' solution, companies can benefit from having a clear perspective of the entire operation of their fleet, the fuel consumption, operating cost, consolidate and manage trips, dispatch management, increasing productivity and lower overall operating costs.

Asset Tracking – Know where your assets are, gives you peace of mind.

At the core of our solution, is a highly efficient tracking engine. The complex technicalities are shielded from the user, leaving a simple to install hardware device and a user friendly interface for anybody to start tracking their assets immediately.

Asset Tracking forms the foundation of our multi-tiered solution, with a wide range of functionalities such as, Real-Time Location Status, Asset History Logs & Status, Geofence, Usage Management, and Alerts & Notification.

Solutions:

- Asset Tracking
- Personal Tracking
- Fleet Management
- RFID Solution
- Satellite Solution
- Hosted Service
- Cross Border Tracking

Personnel Management – People are the most valuable assets.

The Personnel Management module is not to be mistaken as any normal HR system. Rather, the capabilities of the Personnel Management module allows any logistics, transport or work site management company to extend greater control over their operations, scheduling and allocation of their people resources.

Combined with the core Asset Tracking module, Personnel Management allows corporations to be more efficient in their operations by managing their workforce, monitoring the performance of their workers, identify bottlenecks and take immediate actions by relocating any underutilized resources.

Fleet Management – Having Command and Control over your fleet is not just a game.

The Fleet Management module, leverages on the components built inside Asset Tracking and Personnel Management to allow the total integrated management of your fleet. Fleet Management module provides a complete picture of your fleet's operating condition. It allows the monitoring of your entire fleet's fuel consumption, drivers' safety and compliance matters, maximize your fleet's efficiency through dispatch management, lowers expensive repair costs through maintenance and monitoring, and combines the data gathered through the Asset Tracking and Personnel Management to provide financial analysis on your fleets' entire operating cost.

Having Peace Of Mind With Covexis Through Increase Visibility And Security

Asset Tracking

Designed for businesses with movable assets as well as individual vehicle owners. Vehicle is installed with a small device which talks to a central server logging all movements. Movement logs are available through our portal which provides real time information and past records. Controls and monitors your vehicle remotely with our trackers' Input / Output functions. Proven to protect your asset and ensure that your driver and vehicle is at their best performance.

Personal Tracking

Designed for personal use to safe guard your family and friends. Whether you are just checking in or allowing others to monitor your movements, we will give you the edge to letting others know where you are when you need them to. Suitable for businesses to monitor their human assets that are constantly on the move. Movement logs are available through our portal which provides real time information and past records. In case of any emergency, the tracker will be able to launch an alert to all your friends, family and to your nearest authority.

Fleet Management

Management solution for your fleet of movable assets. Our fleet management solution includes vehicle financing, vehicle maintenance, vehicle telematics (tracking and diagnostic), driver management, fuel management, and many other customizable requirements. Fleet management is proven to minimize risks associated with vehicle investment, improving efficiency, productivity and eliminating unnecessary transportation cost. Our hardware capability provides several remote control features to the vehicle which ensures that it runs at optimal and provides an edge against unlawful actions.

RFID

RFID asset management is now a mature technology and has been adopted and indeed mandated as compulsory requirement for organizations such as US Department of Defence (DOD) and Wal-Mart, two of the world largest logistics operators. The range of applications that take advantage of RFID is large and continues to grow as advances in technology and a falling RFID costs enable more applications to become viable. RFID solutions are now commonly applied for personal and access control, manufacturing automation, logistics and automation, retail, maintenance and service, security (anti-tempering, product authentication, theft, etc).

Satellite

Operating in an area with low cell-network coverage? Then satellite solution is your answer. Satellite solution allows you to track your assets virtually anywhere in the world. Our hardware operates with all major satellite providers and tracks your assets through our portal.

Hosted Services

Covexis Hosted Services is designed for individuals and SMEs who sees the real value in our tracking services at an extremely affordable cost.

How it works? Easy 4-steps:

1. Purchase the hardware and install onto your vehicle
2. Subscribe to our service, and
3. Subscribe to a data plan with your preferred Telco OR through us,
4. Start Tracking!

Cross Border Tracking

Cross border tracking is a service provided for people who drives across the border and would love to have a peace of mind that their vehicle can be easily detectable, thereby increasing the chance of recovering your vehicle.

How it works?

1. A device is planted onto your vehicle.
2. Once you have crossed the border, the device will automatically activate.
3. In case of any emergency, [contact us!](#)
